

# Game Modes

There are a few different ways for you to enjoy our facilities, depending on your group size:

**The Typical style** of game is intended for 2-7 players, and it is the way most escape rooms function; your group will all enter the caper together, and work together to solve its clues and escape before time is up.

**The Compete style** breaks your group into two teams who face off to solve two different (and separate) parts of the caper first. Whoever succeeds (or gets furthest) wins the round. Both teams then face off a second time, solving the part of the caper that the other team was tasked with first. At the end, the results are compiled, and a winner is announced.

**The Tournament style** works the same way as the Compete Style, except your group will be split into 3 teams. Groups will then compete against once another in turns, while groups that aren't competing have a chance to socialize, discuss, and sample our collection of games and puzzles. In the end, we'll compile the results, and let you know who won. This is a perfect style for larger birthday parties and corporate events, as it gives you time to both play and mingle.

Play Style	Number of Players	Puzzle Time For Each Player	Down Time For Each Player	Total Time	How Long Before My Appointment Should I Arrive?
Typical	2-6	60 min	-	1 ½ hours	5 min
Compete	8-16	60 min	15 min	2 hours	15 min
Tournament	15-21	60 min	60 min	3 hours	20 min

## Quick Mode

If you've got a compete or tournament style group that needs to get in out quickly, ask about our quick mode. This cuts game time down to 30 minutes per person, with a corresponding reduction in price.

## Staggered Arrival

Our fire codes don't allow more than 21 customers on premises at a time. If you've got a group size larger than this, we can arrange to have your group arrive at staggered times, so that everybody gets to enjoy our facility. For those whose turn it is to wait, there are plenty of cafes and restaurants in easy walking distance.
